

# Connected Learning at Balga Primary

# Maintaining Relationships and Connections, and Keep Learning

Connected Learning is new for everyone; you, your child, your child's teacher and the school—everyone is learning. The priority of Balga Primary School is to stay connected and support you and your family. Through our relationship and regular connections we can do what is best for everyone.

## How Connected Learning works at Balga Primary

Connected Learning is learning your child does at home. Balga Primary school has provided our community with two options:

### 1. Seesaw Class (Online)

Teachers will connect with students, post daily activities and give feedback.

### 2. Work Packages (Offline)

Ready for collection from the office each Monday during school terms.

Additional activities and advice can be found on our website: [balgaps.wa.edu.au/](http://balgaps.wa.edu.au/)

We are here to help! We are contacting each family weekly. This is a great chance to have a chat, let us know how things are going and to ask for any advice.

Phone: 9253 4500

Seesaw: message your teacher using Seesaw

Email: [balga.ps@education.wa.edu.au](mailto:balga.ps@education.wa.edu.au)

## What you can do

Download **Seesaw Class** for your child. This is different to the Seesaw Family app.

Parents and caregivers are not replacing teachers, but you can help your child. Here are some strategies:

1. Set up a daily routine and quiet learning environment.
2. Help your child where you can.
3. Help your child ask their teacher for help (message through Seesaw or phone).
4. Remember that you and your families wellbeing is most important to us. You can always come back to the work if it becomes too much.
5. Play fun games with your child!

## What your child can do

Children will take time to adjust to the new way of learning - there might be some trial and error. Here are a few tips for your child that might help:

1. Set up a daily routine and stick to it if you can.
2. Keep your work environment tidy.
3. Take some time to play - it's good to take a break and get active!
4. Keep playing with Seesaw - you'll get better at it!
5. Ask for help if you need it.

It is important that your child communicates with their teacher each day or each week with the offline

## Please Remember

- Firstly, take care of yourself and your family.
- Connected Learning is NOT about turning the home into school and parents into teachers. We are here to support you and your child's learning.
